### OPTIMIZED TECHNOLOGY SOLUTIONS TO ACHIEVE EFFECTIVE BUSINESS RESULTS

Fortify's approach to infrastructure outsourcing embraces the philosophy of delivering business results. We offer a flexible set of services—from totally transforming your service delivery model to simply addressing a specific cost or performance issue with fully integrated remote and on-site delivery. To enable your business to achieve high performance, you need the right infrastructure at the right cost to support your critical applications and business processes.

We enable companies to:

- Transform IT to become a flexible and responsive enabler of business needs.
- Achieve rapid cost savings, enabling clients to reinvest in higher-value projects.
- Improve IT operational efficiency while reducing all costs related to IT management.
- Reduce the cost of business on a unit basis
- Manage risk and compliance more effectively

### IDENTITY AND ACCESS MANAGEMENT

Manage people and asset identities, solutions that should be implemented to manage and protect their identity data (synchronization, password management, and user provisioning), entitlements and policies.

### DATA CENTER SERVICES
